

## **REAL. TEXAS. SERVICE. CHAMPION**

### **Tony Douglas, Public Works**

Tony is the Assistant Manager of Streets in the Public Works Department. He is responsible for the division's contractual and operational duties. He currently oversees eight different private construction contracts, requiring close attention to detail, timeliness and the quality of work performed. One of the projects Tony assists with is the successful street bond program to improve neighborhood roads in our community.

Tony's work often requires him to make personal contact with citizens and contractors alike. Juggling both roles can be difficult, but Tony's communication and customer service skills are exceptional. And those have been on display during the Real. Texas. Roads. video updates he has hosted on social media.

He is an invaluable member of the City's team. Thank you, Tony, for providing the Mesquite community with Real. Texas. Service.
